Portable Genealogy Handout

Moving a Legacy File to Families

- 1 Download and install Families Sync on PC and Families app on device
- 2 Load GEDCOM in Legacy basic or use your Legacy FDB file
- **3** Select the Legacy FDB file and click OK to convert to create the SQLITE file
- 4 Use Families Sync to find your device over Wifi (IP 192.168.0.50:5050)
- 5 Tap Sync in the Families app on device
- 6 If device isn't shown use view on device to find IP address and enter it
- 7 Choose 'Write to Device' on PC

(The fdb file will be converted to SQLite in the process)

Alternative: Use Convert Family File in Families Sync to create the SQLite file and upload to a cloud service. Open the file on your device from the cloud service.

See Android How To instructions at https://www.telgen.co.uk/families/fsandroid/index.html

See iOS How To instructions at https://www.telgen.co.uk/families/fsios/index.html

Loading a GEDCOM into GEDStar Pro

- 1 Download and install GEDStar Pro on PC and GEDStar Pro app on device
- 2 Open GEDStar Pro and use Select Database to find your GEDCOM file
- **3** Next select the cloud service you want to use and pick Convert Database
- 4 The [filename].gedstar will be copied to the cloud service selected
- 5 Open the GEDStar Pro app and tap settings to select your database

Alternative: Use a USB connection to copy the [filename].gedstar file from your computer to the GEDStar Pro folder under 'device storage' on your device.

See direct transfer help at http://gedstarpro.com/doc/transfer.php

Creating a Portable Apps USB Drive

- 1 Download Portable Apps Platform from https://portableapps.com/download
- 2 Insert blank 8GB USB drive and run Portable Apps program file
- 3 Select USB drive and click Finish to install platform
- 4 Select apps from the catalog eg. Gramps and click Finish to add them
- 5 Run Start from the USB drive and choose the app you want to use
- 6 Load a GEDCOM file into Gramps and your file is portable
